To become a model for higher learning through development to prepare self-disciplined, creative, culturally competent and dynamic Information Technocrats while remaining sensitive to ethical, societal and environmental issues.

ABOUT THE NATIONAL SEMINAR

Internet of Things (IoT) is presently a hot technology worldwide. Government, academia, and industry are involved in different aspects of research, implementation and business with IoT. Today it is possible to envision pervasive connectivity, storage and computation, which, in turn, gives rise to building different IoT solutions. The IoT offering ranges from managed connectivity to devise management and application software to any form of analytics. Therefore, it is very important to learn the fundamentals of this emerging technology.
